## About Me

### Diego Alejandro Balmaceda Selva

Managua, Nicaragua.  
Dn. Bosco Clinic, 2bl. N, 1/2bl. E.

**Phone:** (+505)86228910

**Email:** [diego@xaes.dev](mailto:diego@xaes.dev)

**Website:** [Click Here](http://xaes.dev) (xaes.dev)

As a self-taught freelance developer with a passion for front-end development, I have honed my expertise in crafting advanced web applications and services using Java and NodeJS. With over 6 years of professional experience, I have demonstrated my ability to deliver high-quality code and exceptional results.

Since starting my career at the age of 18, I have remained committed to constant learning and improvement. I frequently pursue personal software projects to explore new technologies and further develop my skills. This dedication to learning and staying up-to-date with industry trends has allowed me to provide innovative solutions to my clients and maintain a competitive edge in the marketplace.

---

## Stack

**Cloud Services:** AWS ECS, EC2, SES, SNS, SQS, RDS, DocumentDB, Load Balancers, API Gateway, AWS Lambda, Vercel, Netlify, OpenAI.

**Databases:** Mongo, Postgres.

---

## Experience

### **Jobchain GmbH, Full Web Stack Developer**

May 2022 - Present, Remote.

Had the opportunity to fully develop localization services and private libs with OpenAI and Python. In charge of several web services such as: main website, labor app, user management app. With tools like: NextJS, Typescript, NestJS and MongoDB.

### **Dotsub, Full Web Stack Developer**

Dec 2021 - April 2022, Remote.

I was mainly working on enhancing the very outdated UI / UX made on React, migrating everything to Tailwind, designing new screens. I was also working on backend tasks with Java / Spring. I got to work on media encoding processes and also learned a lot of development processes and agile methodologies.

### **Jobchain GmbH, Full Web Stack Developer**

May 2020 - Sept. 2021, Remote.

Took care of all environments on the development process stages, from design to deployment. Worked closely with AWS Services, and made all the front-end with React, Gatsby and the back-end by myself using Express, Node, AWS DocumentDB, Docker, ECS.

### **MyCointainer, Frontend Developer**

April 2020 - May 2020, Remote.

Made components based on templates provided by the design team using React. Eventually, I was also assigned to back-end tasks using Express and Mongo.

### **Mowjow, Full Web Stack Developer**

October 2019 - March 2020, Remote.

Mainly front-end development, but I also was assigned to make back-end systems and integrate them with chat bot (like Telegram) on NodeJS.

### **Themeforest, Freelancer**

September 2017 - 2022, Remote.

Made website templates for GhostCMS. My templates are in the Top 10 of the most sold themes (Ghost). Began to work on them when I was on highschool. Became a 5-star seller / author and gathered experience with customer service and support.

### **Fiverr, Freelancer**

October 2019 - March 2020, Remote.

A 5-star freelancer with more than 20 jobs completed. I had gig's ranging from Ghost CMS template development to back-end development with NodeJS.
